

# Multi-threaded model

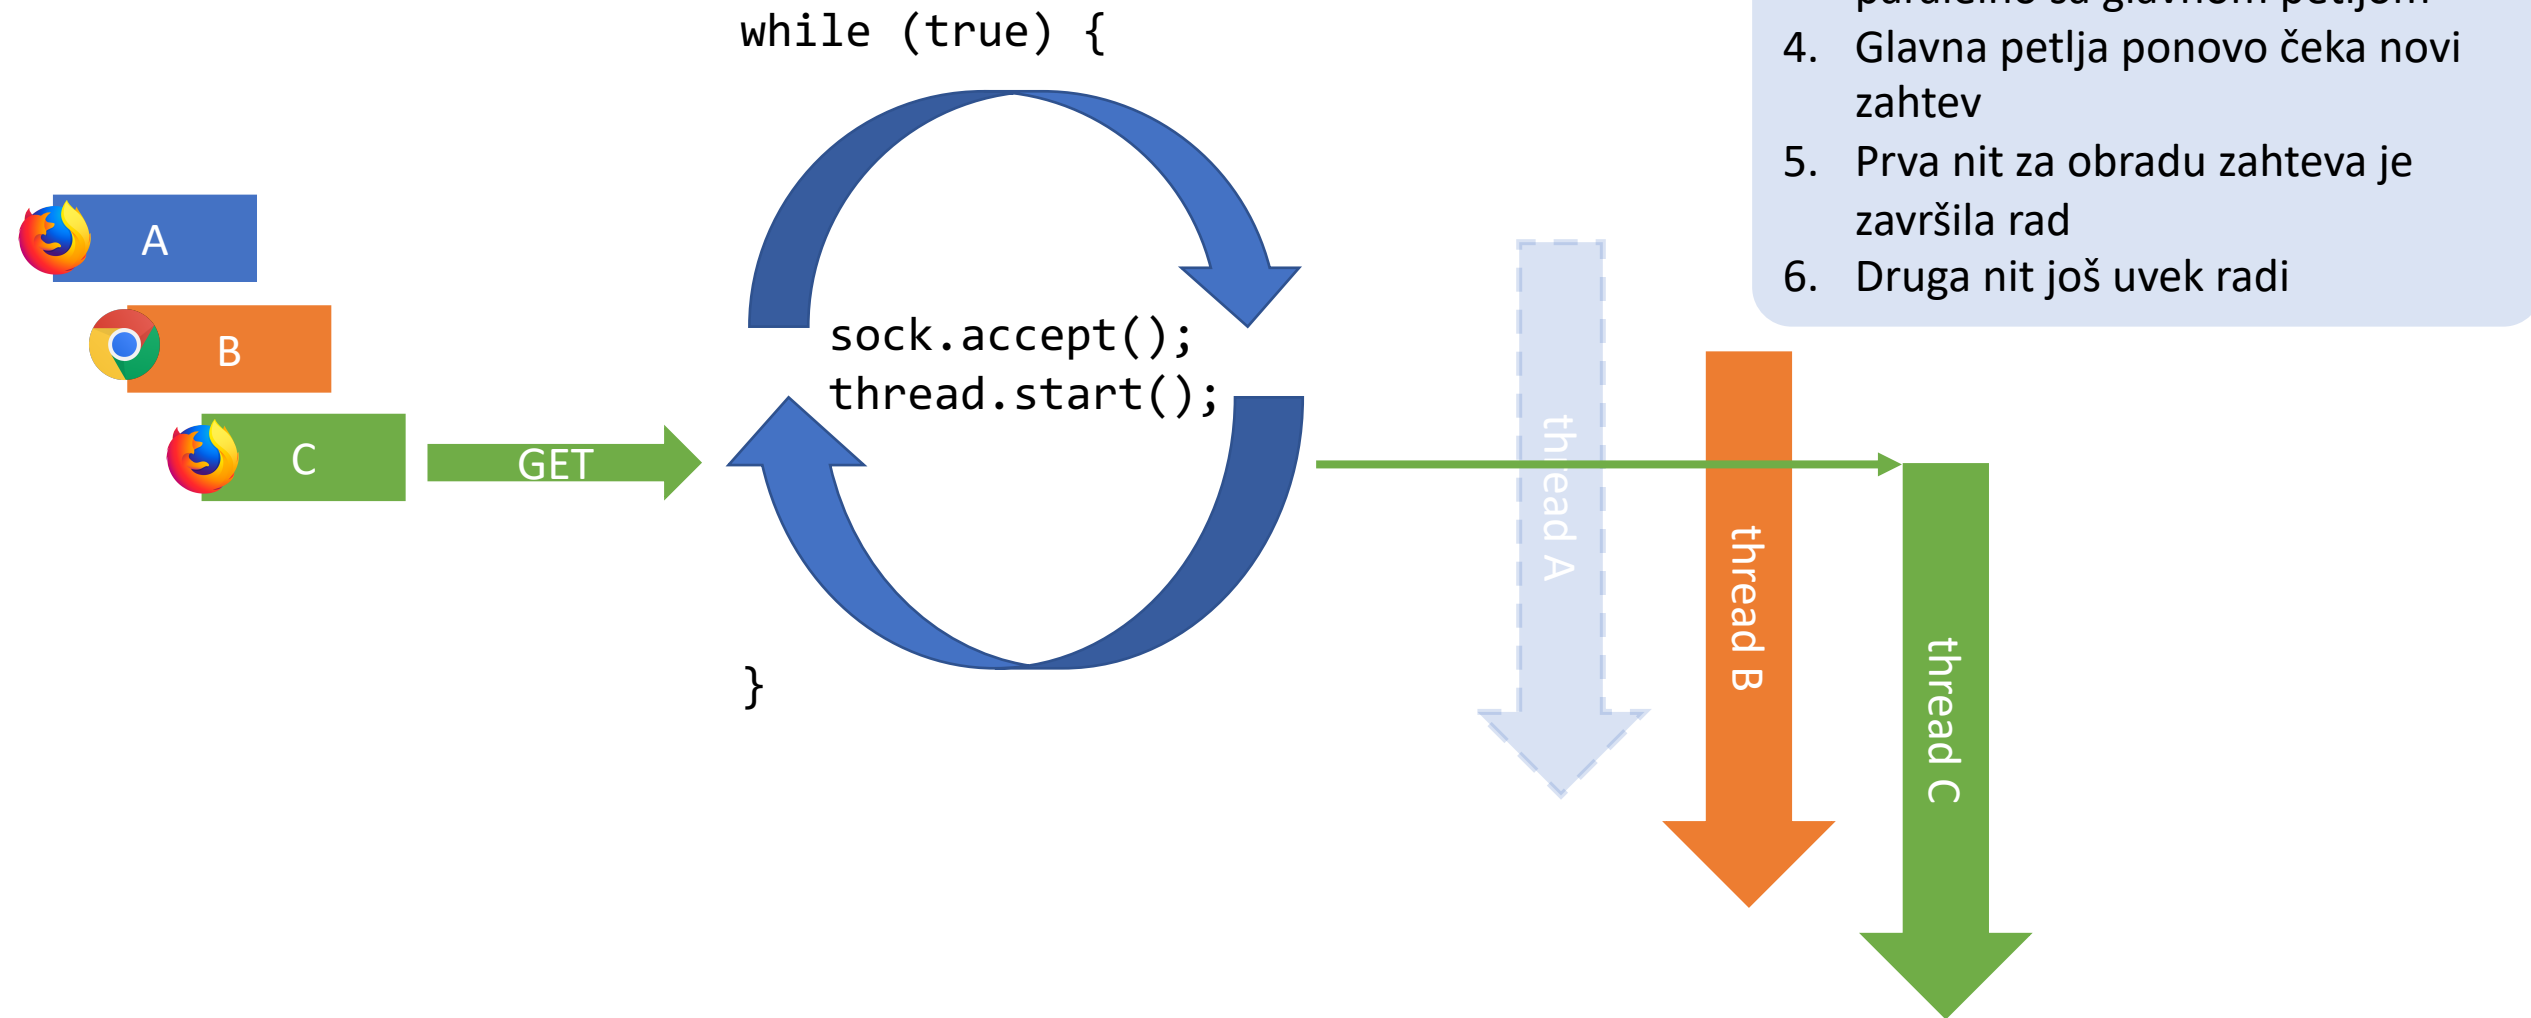

1. Klijent A šalje GET zahtev serveru
2. Serverska glavna petlja pokreće novu nit za obradu zahteva
3. Nit počinje obradu zahteva paralelno sa glavnom petljom
4. Glavna petlja ponovo čeka novi zahtev

# Multi-threaded model

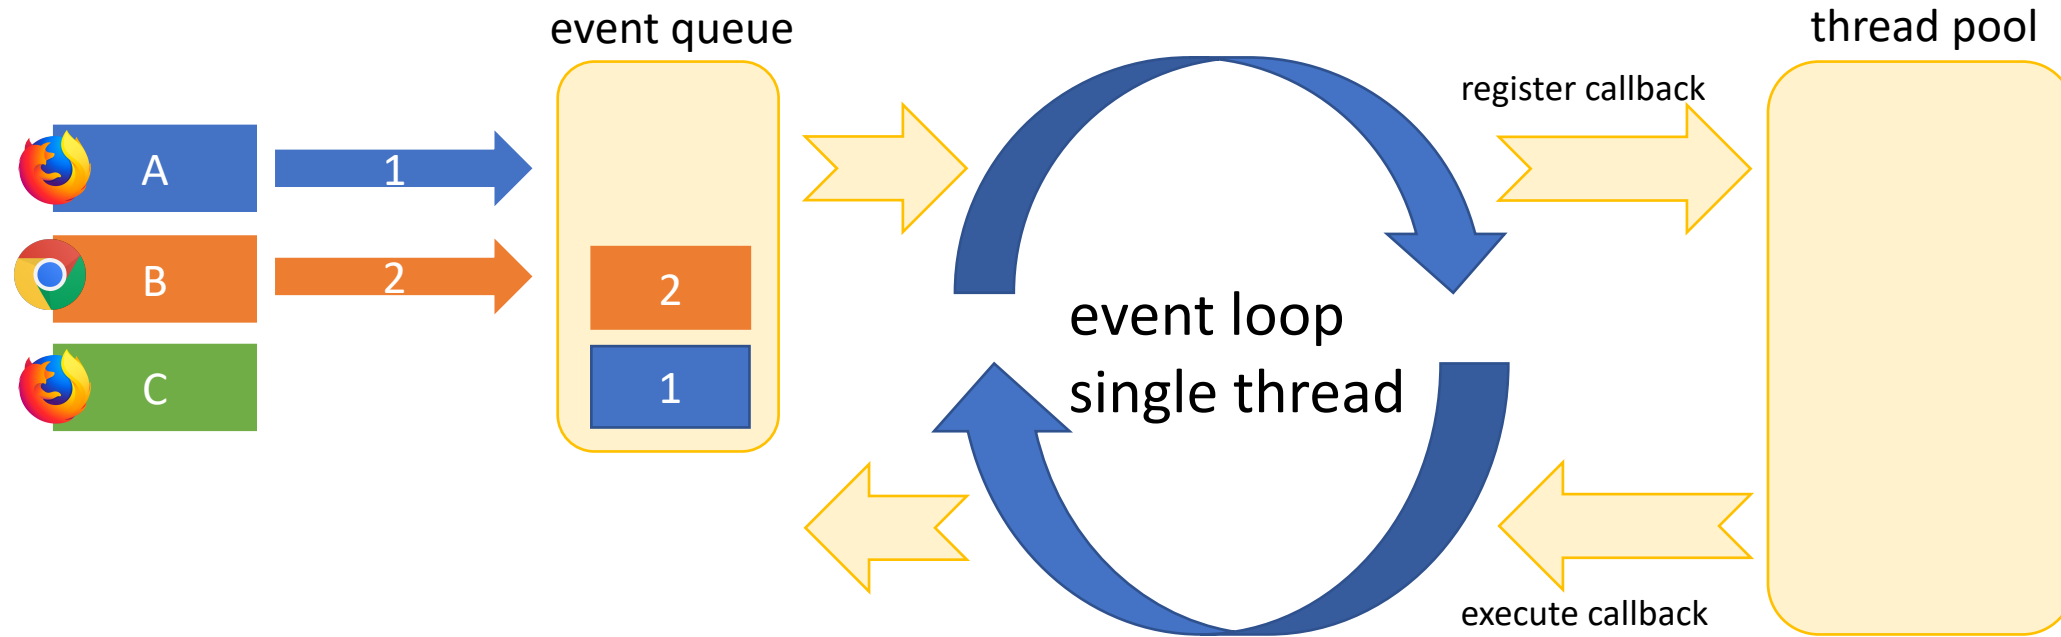

1. Klijent B šalje GET zahtev serveru
2. Serverska glavna petlja pokreće novu nit za obradu zahteva
3. Nit počinje obradu zahteva paralelno sa glavnom petljom
4. Glavna petlja ponovo čeka novi zahtev
5. Prethodna nit za obradu zahteva još nije završila rad
